DCI/DDCI Executive Staff

7 September 1988

NOTE FOR: DCI

SUBJECT: NSPG Meeting, 8 September 1988

Attached are talking points and a number of background charts and tables for your NSPG meeting on Thursday. The prime purpose of this meeting will be to review the US position on funding the United Nations. I have spoken to the DI and the DO and both indicate there are virtually no intelligence issues that you need to raise at this meeting--all the issues to be discussed are on the policy front. As you know, the funding issue has been a problem for a while because many people in the present Administration believe we get very little out of the UN. You might want to note from a factual standpoint that our analysis shows that African countries and the non-aligned movement as a block have been equally unsupportive of the US and the Soviet Union on issues considered crucial by either superpower.

You need to decide if you want anyone to go along with you. I would suggest taking Mr. Kerr.

Given the subject matter and the lack of direct intelligence interests, I have not scheduled a pre-brief for you. If you would like one, please let me know.
